Index III: Names and Places

This index lists names of artists and artisans (painters, architects, stonemasons, carpenters, etc.), collectors, patrons and owners of the buildings discussed, as well as other historical figures. Buildings are listed under the name of the cities. Names of buildings printed in *italics* and marked with a letter or a roman numeral in bold are those which appear in the *Palazzi di Genova*, for which see Index I. Alternative names for some of these palaces and villas (indicated by inverted commas) are listed in the present index under *Genoa* and are followed by the names used here (one and the same name may at times have been used for several different buildings). Under the names of Genoese families reference is also made to the palaces and villas they have owned at one time or another; for individual members of a family the particular building(s) they commissioned to be built are mentioned.
